TEXAS 2 STEPS

(Successfully Teaching Early Purposeful Skills)
An Evaluation Tool for Orientation and Mobility Specialists

Scoring Tool

Directions

Texas 2 STEPS (T2S) is an early intervention orientation and mobility curriculum. It is divided into two domains – mobility skills, and orientation, and includes an evaluation tool as well as the curriculum.

The **evaluation tool** may be used for both initial and ongoing evaluation for determining present levels of performance, developing goals and monitoring student progress.

The **curriculum** is composed of family friendly activities that correspond to each skill in the evaluation. Each section includes an introduction that provides a rationale for the skill set and an overview of general accommodations. Activities are included that should be copied and shared with caregivers and additional team members to support orientation and mobility in daily routines. These activities provide multiple opportunities for practicing new skills across environments.

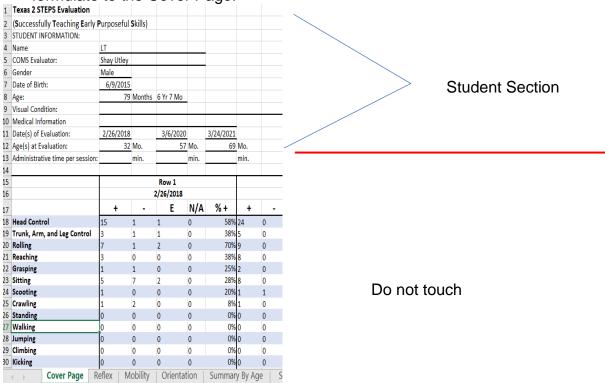

The **scoring tool**, included as an excel document, is on the flash drive that is part of the set. The document is formatted to do the calculations for you.

- Texas 2 Steps Evaluation Simple Excel.xlsx This is one that can be used to print sections
- Texas 2 Steps Evaluation.xltx This document is the one to use for scoring.

There are tabs at the bottom of the document that include Cover Page, Reflexes, Mobility, Orientation, Summary by Age and Summary Overview Skill Level.

Cover Page

- Fill out the student information at the top of the page.
- The birthdate will automatically formulate to the students current age.
- The dates of evaluation will formulate to the age the student is/was at the that time of the evaluation.
- Nothing needs to be filled out past the student information section.
- The information added to the Mobility and Orientation Sections will automatically formulate to the Cover Page.

Reflexes

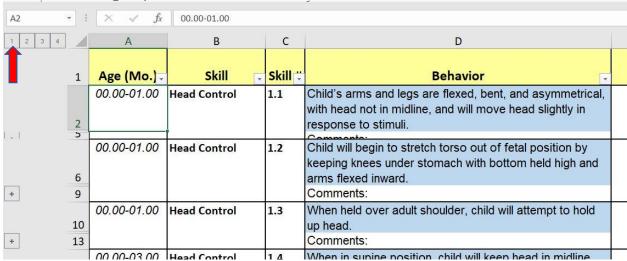

This section of the tool is to be used for observation only. Although this reflexes section is not all encompassing, it is expected that this tool will facilitate collaborative program planning and early intervention for developmental orientation and mobility.

Mobility

Using the evaluation that has been completed on the student, add a +, -, E, N/A to the correlating evaluation date from the Cover Page. For example, column 1 on the Mobility section will formulate the data/percentages on Row 1 of the Cover Page.

Use the sidebars to group and ungroup the evaluation. See below.

1 will close the grouped rows in the document

2 will open the grouped rows in the document where you can view the Evaluation Suggestion and Comments.

A2	* I	\times \checkmark f_x	00.00-01.00				
1 2 3	4	Α	В	С	D	E	F
1						Date/	Date
	1	Age (Mo.)	Skill	Skill "	Behavior 🔻	Score 🐷	Scor
_		00.00-01.00	Head Control	1.1	Child's arms and legs are flexed, bent, and asymmetrical,		0.
					with head not in midline, and will move head slightly in	·—·	_
	2				response to stimuli.		
					Evaluation Suggestions: Child will turn head to suckle		
**	3				when cheek is touched.		
	4				Comments:		
1	5		1				
		00.00-01.00	Head Control	1.2	Child will begin to stretch torso out of fetal position by		
					keeping knees under stomach with bottom held high and	_	_
(性)	6				arms flexed inward.		
T					Evaluation Suggestions: Observe child in natural		
					environment. Child keeps knees and arms under torso		
	7				and stretches to lengthen back.		
	8				Comments:		
-	9				Provide proposition and the control of the control		
		00.00-01.00	Head Control	1.3	When held over adult shoulder, child will attempt to hold		_
	10				up head.	-	_

Orientation

Using the evaluation that has been completed on the student, add a +, -, E, N/A to the correlating evaluation date from the Cover Page. For example, column 1 on the Mobility section will formulate the data/percentages on Row 1 of the Cover Page. Use the sidebars to group and ungroup the evaluation. See below.

1 will close the grouped rows in the document

Summary by Age

This tab is strictly to view data. It will calculate the number of skills the student has in each age group.

Summary Overview Skill Level

This tab list all the skill numbers for each area.

As each evaluation is completed, highlight that skill in a different color to indicate mastery. This will help you view splintered skills the student has.

	2/26	5/2018	3/6	/2020	3/24	/2021

Comparative Concepts	9.1	9.2	9.3	9.4	9.5	9.6	9.7	9.8	9.9	9.10	9.11	9.12														

Recommendation: if the skill is an N/A, highlight it in order to not view it as a skill needed to be addressed. For example, if the skill is a visual skill and the student is blind. They will not master that skill but is should not be viewed in this section as a splintered skill either.

Reporting on the Data

The cover page will give you the most data that you can report on. As your evaluations progress, you will be able to see the improvement in skill areas and the percentages in which the student's skills have increased.

The data can be copy and pasted into the report.

See example below

Orientation and Mobility Assessment

d to assess the student's

According to the guidelines established by the Individuals with Disabilities Education Act and the Commissioner/SBOE rules this student needs O&M services to benefit from instruction. This service needs to be delivered in the school, home, and/or community to address these (this) training need(s): Based on this evaluation, does not need direct orientation and mobility
training at this time to benefit from instruction. Based on this evaluation, does need direct orientation and mobility training to benefit from instruction
RECOMMENDATIONS: Orientation and mobility consultation is recommended time(s) a month/year. Direct orientation and mobility instruction is recommended time(s) a week for minutes. Continued direct orientation and mobility instruction is recommended times a week for minutes. Discontinue direct orientation and mobility training. Orientation and mobility services are not recommended. An Orientation and Mobility Specialist will attend the ARD upon request. The physical education teacher needs to be aware of the student's limited eyesight. Re-evaluation is available upon request as student matures and/or needs or environment change.
Signature of Evaluator Certified Orientation and Mobility Specialist
